

**Amendments to the Specification:**

Please replace the paragraph beginning at page 1, line 6, with the following rewritten paragraph:

---

Q1 The present application is related to U.S. Patent No. 6,512,553, ~~Application~~,  
entitled "ARCHITECTURE FOR A VIDEO PREAMPLIFIER WITH AN ON-SCREEN  
DISPLAY", by Ronald W. Page, serial no. \_\_\_\_\_, ~~Attorney Docket No. NS-~~  
~~3286~~, filed on the same day as the present application, and assigned to National  
Semiconductor Corporation, which is also the assignee of the present application.

---

Please replace the Abstract paragraph beginning at page 13, line 1, with the following  
rewritten paragraph:

---

Q2 A video amplifier having an on-screen display (OSD) capability uses one channel  
of an OSD input video signal to generate a blanking signal for blocking output of a video  
signal. When the blanking signal is asserted, the ~~remainder two~~ OSD channels provide  
the on-screen display. The blanking signal is generated in a high speed mixer circuit  
including an emitter-coupled differential pair for amplifying the OSD input signal about  
an operating DC offset voltage and a pull down circuit for providing the blanking signal.
